

Banking Customer Transaction Analytics Dashboard

Ajish
B.E(Computer Science)

Project Description

- Developed an interactive **Banking Customer Transaction Analytics Dashboard** using Power BI.
- Analyzed **customer, account, transaction, and balance data**.
- Created **KPIs, charts, and interactive filters** to track banking performance.
- Analyzed **transaction trends, customer behavior, and account balances**.
- Used **Power Query** for data cleaning and transformation.
- Used **DAX** to create calculated measures and business insights.
- Designed a user-friendly dashboard to support **data-driven decision-making**.
